# All Non-Healthcare Outbreaks\* by Onset Date or Week Opened and Setting February 16, 2020 – May 8, 2021

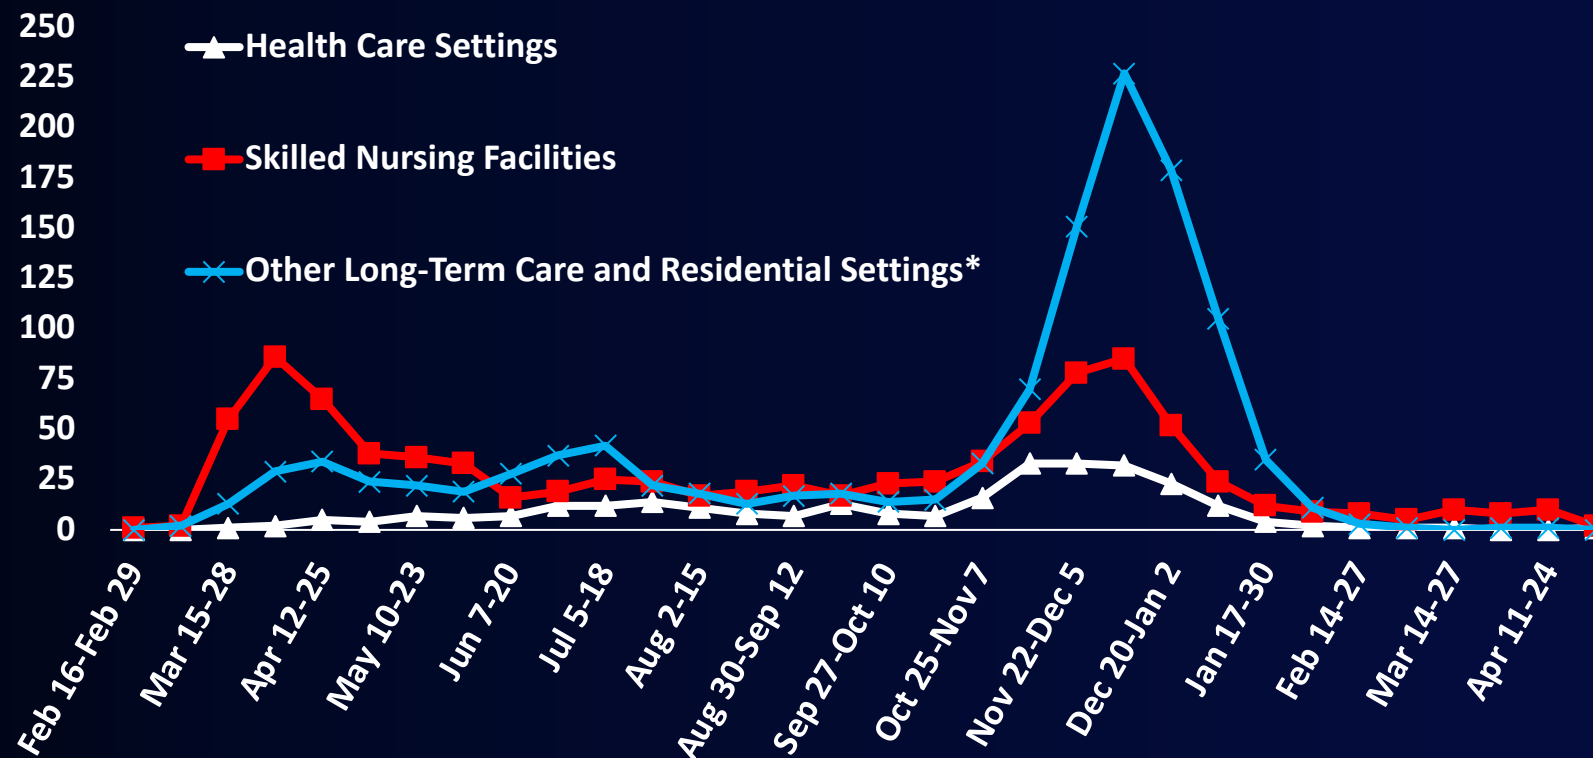

\*Food facilities and worksites temporarily operated under surge criteria from mid-December to mid-March, which necessitated outbreaks with fewer than ten reported cases to be sent to Environmental Health for their follow-up. These may not be included on the trendlines above.

\*\*Some first responder outbreaks were entered retroactively; the onset dates for these are still being refined.

## All Healthcare and Long-Term Care Outbreaks\* by Onset Date or Week Opened and Setting February 16, 2020 – May 8, 2021

\*Other long-term care and residential settings implemented surge criteria in December, which raised the threshold for outbreak criteria in non-skilled nursing facility long-term care settings. These may not be included on the trendlines above.
